BLUE WAVE RIGGING HARDWARE

In business since 1932, Danish based Blue Wave A/S is today among the leading manufacturers of high quality stainless steel rigging hardware. Focus has for years been on Marine, Architectural and Industrial sectors.

By constant development and investments in high tech production machinery, focus on customer needs and wishes, a well known brand name has been established.

Key factor and future aim, is continued development backed by customer commitment and driven by market demand.

Applying efficient production, good design, low weight and optimal strength to its products Blue Wave strives to become the number one chosen supplier of rigging hardware.

Manufactured to the highest quality materials and tested in their design and performance, Blue Wave components are used for marine and structural rigging around the world.

Dyneema® or Ultra-high-molecular-weight polyethylene (UHMWPE, UHMW) ropes have the advantage of a ultra high strength versus weight while being highly flexible.

As an alternative to e.g. stainless steel wires, the synthetic fiber ropes used in various applications feature a significant advantage compared to traditional materials and have opened a new field of possibilities and features in rigging.

The Blue Wave RopeLine

Being a world leading manufacturer in the field of end fittings for wire and rod rigging, Blue Wave has now also developed a range of end fittings for fiber ropes like Dyneema®

Materials used are Stainless Steel AISI316 and marine grade aluminium.

Standard hardware solutions amongst others include:

- Eyes
- Forks
- Ball Ends
- Threaded Studs
- Turnbuckles
- T-Ends
- Swage Fitting Connections
- Heavy Duty Thimbles
- Reinforced Thimbles

All fittings are engineered and tested to break loads stated in the technical schemes and guarantees safe and reliable performance.

Copyright Gleistein Ropes

Correct attachment

When terminating high modulus fiber like Dyneema® rope a knot for example can reduce the ropes strength by up to 60% and will seat and slip under load.

All Blue Wave end fittings are made for and tested with spliced rope attachment.

For correct attachment/splicing contact your local rigger.

Safe working loads

Blue Wave recommends that safe work loads should not to exceed one fifth (1/5) of the break loads listed.

Dyneema® is a registered trademark of DSM

BLUE WAVE®

ROPE END FITTING

- New innovative product
- More opportunities to benefit from UHMWPE and UHMW ropes
- Unique and slim design
- Easy and viable to use and assemble
- AISI316L stainless steel, and black anodized aluminium
- Easy to fit to existing rigging screws and deck fittings
- Backed by a full range of high quality rigging hardware

Community Design Registration 14/6 2017
design reg. -004048098-0001

"KEEP IT SIMPLE"

Slide the housing over the rope

Splice around the bone - following your rope suppliers general splice guidelines

Pull spliced bone back in housing

Screw the parts together - threads can be locked with Loctite
